Professional Summary

Having 4.9 Years of software development experience in all the phases of **Java** applications. Involved in development of **Banking Domain** applications, possess good communication, can easily adapt to the work platform. **Worked at Client Location (NBM Bank, Malawi).**

Key Activities Performed

Design, developing and delivering the web applications using **Agile Methodologies**.

Hands on working experience in **OOP'S Concepts, Exception Handling, Multithreading and Collections**.

Hands on working experience in **Servlets, JSP, Spring Boot, Hibernate, Couchbase DB**.

Hands on experience in developing **OFS, SOAP, REST, ISO8583** Web services.

Hands on working experience in **MySQL, MS SQL**.

Troubleshooting and debugging.

Academic Profile

- **Bachelor of Technology (B.Tech.)** from J.N.T.U.A, during 2012- 2016.

Technical Skills

Programming Languages: Core Java,
Data Management: MySQL, SQL Server, Oracle, Couchbase.
Java/J2EE Technologies: Servlets, JSP, JDBC
Frameworks: Spring, Spring Boot, Hibernate.
Tools: Maven, Postman, SoapUI, GIT, Sonar lint, I-report.
Web Services: OFS, Soap, REST, ISO 8583 Web services.
Web Server: Tomcat.
Methodologies: Agile.
Work Domain: Banking, Financial Tech.

Professional Experience

- Working as Software Engineer in **Atos Syntel,** Bangalore from Feb-2022 to till today.

- Worked as Software Engineer in **ModeFinserver,** Bangalore from May-2018 to Feb-202

Projects Profile

Project: American Express (AMEX)

Client: American Express

Environment: Spring Boot, RESTful Web Services, Couchbase DB, Swagger.
Role: Java Backend Developer

Project Description: It's one of the banking application which allows Amex Credit card Holders to Book the flights, Hotels, Cars, Trips.

Roles and Responsibilities:

- Implementation of controller classes using Spring Boot.
- Implementation of Rest Web Services APIs for Automation applications.
- Implementation of database interacting using Couchbase DB.
- Implementation of SSL certificates and generating JKS files to provide Security.
- Performing validation of the features after deployments in the existing application.
- Provide regular status and progress towards milestones with Scrum Master.

Project: NBM (National Bank of Malawi)

Client: National Bank of Malawi, Malawi
Environment: Java/J2EE, Spring, OFS & Soap Web Services, Maven, MS SQL, Hibernate
Role: Java Backend Developer

Project Description: It's one of the banking application which allows registered customers to use Internet Banking, Mobile Banking, USSD, Wallet Banking, Agency Banking to do their financial transactions of provided services by bank.

Roles and Responsibilities:

- Implementation of controller classes as per business logic
- Implementation of screen design & exposing APIs to App team
- Implementation of database interacting using JDBC & Hibernate.
- Implementation of webservices
- Implementation of SSL certificates and generating BKS files to provide Security.
- Interacting with Product team if need to add/modify features in the existing application
- Resolving LIVE issues based on priority
- Provide regular status and progress towards milestones with manager
- Implementing jasper reports using I-report

Project: IZB (Indo Zambia Bank)

Client: Indo Zambia Bank, Zambia

Environment: Core Java, JSP, JDBC, Spring, Iso-8583 Webservice, Maven, MySql , Hibernate

Role: Java Backend Developer

Project Description: It's one of the banking application which allows registered customers to use Internet Banking, Mobile Banking to do their financial transactions of provided services by bank.

Roles and Responsibilities:

- Implementation of controller classes as per business logic
- Implementation of screen design & exposing APIs to App team
- Implementation of database interacting using JDBC & Hibernate.
- Implementation of webservices
- Implementation of SSL certificates and generating BKS files to provide Security.

- Interacting with Product team if need to add/modify features in the existing application

- Resolving LIVE issues based on priority

- Provide regular status and progress towards milestones with manager.
